

INTRODUCING

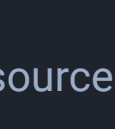

Mastodon for iOS

We're working on an official app for Mastodon on iOS, in addition to the web version and all the third-party apps available below.

[Join the list](#)

Progressive Web App

You can always use Mastodon from the browser on your desktop or phone! It can be added to your home screen and some browsers even support push notifications, just like a native app!

[Join a community >](#)

Open API

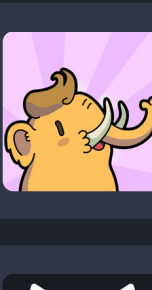

Mastodon is open-source and has an elegant, well-documented API that is available to everyone. Make your own app, or use one of the many third-party apps made by other developers!

[API documentation >](#)

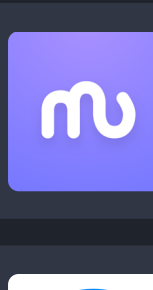

Browse third-party apps

Thanks to Mastodon's open API, you can use it from any of these apps developed by third-party developers
